BELGAUM-590014**

A PROJECT REPORT ON

“MYSTIC EYE – AN INSIGHT INTO DEPTH”

Submitted in Partial Fulfillment of the requirement
For the award of the degree of

**BACHELOR OF ENGINEERING
In
ELECTRONICS AND COMMUNICATION**

By

Pradeep.R. (1GC05EC071)
Ranganath.D.G. (1GC05EC081)
R.Sanjay Mehta. (1GC05EC086)

Under the Guidance of
Mr. Anil Kumar M.N
Asst. professor
Dept E&C

**DEPARTMENT OF ELECTRONICS & COMMUNICATION
GHOUSIA COLLEGE OF ENGINEERING,
RAMANAGARAM-571511
2008-2009**

ABSTRACT

In this universe every living being is associated with radiating the electromagnetic radiations from the body, which is well studied in Bio-medical electronics. The properties of these radiations keep on changing with respect to the environment which they live in, chemical changes in the body, which in turn are affected by the emotions, characters, health etc. Hence these changes in radiations can be utilized as a tool to explore the mental status (emotions or characters) and health in them.

As mentioned above not only living beings radiate electromagnetic radiations, but also non living beings like metals do. But the difference is that the change in radiation's properties is very minimal. These minimal changes also can be used very carefully to observe the changes in their properties, say metal's purity, conductivity etc.

This project's aim is to exploit these changes in the properties in radiations to peak and explore the inner features of the living and non-living beings digitally.
