## **ABSTRACT**

For the final year we the group of three students searched a lot of topics to present a good and useful project that should be easily implemented. Then we finally ended with this project named “PUBLIC PARTNER “

“PUBLIC PARTNER “this name is quite different. If we hear this word, we get confused that the project is related to civil or biological field. But our project is fully based on electrical, electronics and communication. It includes civil and biological aspects.

Our project focuses on maintaining cities clean which is of prime importance in metro and mega cities like Bengaluru, Hubli-Dharwar etc...So it is the duty of the corporation to avoid problems such as overflowing of drainages, street lights “ON” even during day time and other related aspects.
